Ad-hoc / Special Assignment Management

01 Department sends instruction to SDO

02 **SDO registers and selects State(s)**

03 System creates State assignment record

04 State submits short report; SDO + department notified

Separate SDO administration from State reporting. The State officer only sees and completes the report for the assignment issued to their State.

1 SDO ASSIGNMENT REGISTER

Completed by authorised SDO staff only. Records the instruction received from the originating department, attaches the source memo and selects the recipient State(s).

2 STATE ASSIGNMENT RECORD

Created automatically for each selected State. The system copies the assigned-by officer, assignment description and expected output from the SDO register, and calculates the due date. State users cannot edit these details.

3 STATE ASSIGNMENT REPORT

Completed by the State reporting officer. A short report is submitted against the State Assignment ID, with evidence attached where available.

SYSTEM LINKAGE

One Master Assignment ID → one State Assignment ID per State → one linked State report per State assignment.

If the same instruction is sent to 12 States, the system creates 12 State Assignment IDs under one Master Assignment ID.

Ad-hoc / Special Assignment Management

Linked electronic forms for SDO assignment registration, State Office reporting, evidence submission and departmental access.

01 **Department sends instruction outside system**

02 **SDO registers and distributes assignment**

03 **State executes and submits report**

04 **SDO + department receive report**

FORMS & WORKFLOW MOCK-UP • Editable electronic form / dashboard concept • October 2026

Proposed design for discussion and system-development requirements. All sample records and dashboard figures are illustrative.

OPERATING MODEL AND SYSTEM BOUNDARY

Departments continue to communicate assignments to SDO through existing official channels.

OPERATING MODEL

How an assignment enters the system

01 — Originating department

Sends memo, email, circular or approved instruction to SDO outside the system.

02 — SDO registration

SDO enters the assignment, attaches the original instruction and records the scope and deadline.

03 — SDO distribution

SDO selects the State Office(s), confirms deadlines and dispatches each State assignment.

04 — State reporting

State completes the linked report and uploads evidence against its State Assignment ID.

Key principle: one system record for each assignment, with a separate State-level record for every State selected by SDO.

SDO is the system entry and distribution point

No originating department creates or assigns a State task directly in the module. SDO retains responsibility for registering the instruction, selecting recipients, setting system due dates and distributing it.

The original instruction is retained

SDO attaches the memo, circular, email PDF or terms of reference. The State can open the source document alongside its assignment details.

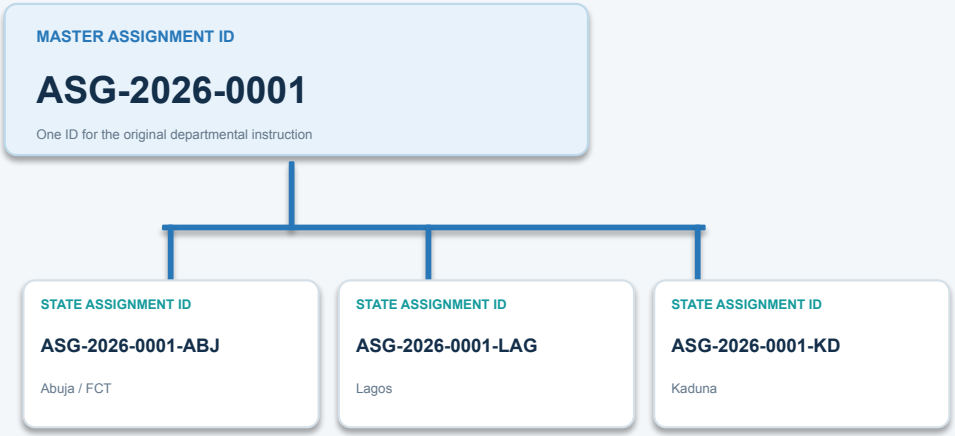

Reports are accessible to the right department

When a State submits a report, the system alerts SDO and the originating department. The department can view and download reports for its own assignments and provide feedback.

ASSIGNMENT ID STRUCTURE AND REPORT LINKAGE

Use one parent record for the original departmental instruction and one child record for each assigned State.

DATA STRUCTURE

Recommended rule

Do not make States type or edit assignment IDs. The system generates both IDs and automatically links the report to the correct assignment.

How the relationship works

- One Master Assignment ID represents the instruction received by SDO.
- SDO creates one State Assignment ID for each State assigned.
- Each State submits its own report under its State Assignment ID.
- Each report retains its evidence, submission date, version and review history.
- The originating department sees all State reports linked to its Master Assignment ID.

For a single-State assignment

The system still creates a Master ID and one State Assignment ID. This keeps the data structure consistent.

FORM 1 — SDO ASSIGNMENT REGISTER

SDO records the official instruction received outside the system and attaches the source document.

SDO FORM

A. Assignment registration

Master Assignment ID
Auto-generated after save

Assignment title *
Enter a short, descriptive title

Originating department *
Select department

Date received *
dd/mm/yyyy

Priority
Normal

Reference / memo number
Enter reference number

Received through
Email / Memo / Letter

Date on instruction
dd/mm/yyyy

SDO officer registering
Select staff / officer

Assignment due date *
dd/mm/yyyy

B. Assignment scope and deliverables

Assignment description / instructions *
Summarise what the department has requested

Expected outputs / deliverables *
List the required deliverables

C. Source document

Original instruction
+ *Upload file / paste link/Upload memo / letter / email / circular*

Reporting requirement
Final / Periodic / Both

Instructions to assigned States/Additional Details
Upload any additional guidance

SOC Reporting officer
Auto-captured from signed-in user

System behaviour

On save, the system generates the Master Assignment ID. SDO can then proceed to the State distribution step. The originating department is selected from the approved NHIA department list; an “Other (Specify)” option is available.

SDO FORM 2 — ASSIGN TO STATE OFFICE(S)

One master assignment can be distributed to one or more States; the system creates a separate State Assignment ID for each recipient.

SDO FORM

A. Distribution settings

Master Assignment ID	Assignment title	Distribution date *	Assignment due date *	Reporting mode
ASG-2026-0001	Auto-populated from register	dd/mm/yyyy	dd/mm/yyyy	Final / Periodic

B. State recipient register

State	Zone	State Assignment ID	Responsible unit / officer	Supporting staff / units	State due date	Notify
Abuja (FCT)	North Central	ASG-2026-0001-ABJ	Select unit / officer	Select staff / unit	dd/mm/yyyy	On
Lagos	South West	ASG-2026-0001-LAG	Select unit / officer	Select staff / unit	dd/mm/yyyy	On
Kaduna	North West	ASG-2026-0001-KD	Select unit / officer	Select staff / unit	dd/mm/yyyy	On

+ Add State

Select all in Zone

State and Zone values are selected from the NHIA directory; Zone is populated automatically from the selected State.

C. Dispatch and notification

Dispatch message	Dispatch channel	Copy zonal coordinator	Attach supplementary guidance
Add instructions for all selected States	In-system notification	Yes / No	+ Upload file / paste link

Dispatch rule

On dispatch, every selected State receives its own assignment record, unique State Assignment ID, source instruction and due date. SDO can amend recipients or dates, with a recorded audit trail.

SDO-ONLY FORM

COMPLETED BY SDO

SDO register — State distribution

SDO selects the recipient States and Zones. The system records the dispatch date and calculates each State due date using the completion period entered in the SDO register.

Master Assignment ID

ASG-2026-0048 • auto-populated

Assignment title

Regional beneficiary sensitisation

Assignment due date *

dd/mm/yyyy

Reporting mode

Final / Periodic ▾

- ☑ Abuja (FCT)
- ☑ Kaduna
- ☑ Lagos
- ☐ Kano
- ☐ Plateau
- ☐ Rivers

Select one or more States. Zone is populated automatically from the State directory.

State	Zone	State Assignment ID	Due (auto)
Abuja (FCT)	North Central	ASG-2026-0048-FCT	30/11/2026
Kaduna	North West	ASG-2026-0048-KD	30/11/2026
Lagos	South West	ASG-2026-0048-LG	30/11/2026

Not collected by the system Responsible unit, responsible officer and supporting staff are not required. The State Coordinator handles internal allocation.

SYSTEM-GENERATED RECORD

READ-ONLY ASSIGNMENT DETAILS

What the State reporting officer sees

The system creates this record from the SDO register. Assignment details are read-only; the due date is calculated automatically.

MY ASSIGNED TASK

State Assignment ID
ASG-2026-0048-KD

State
Kaduna

Assigned by
SDO registering officer

Assignment title
Regional beneficiary sensitisation

Originating department
Informal Sector Department

Date assigned
01/11/2026

Due date
30/11/2026

Assignment description
Auto-populated from the SDO Assignment Register.

Expected output
Auto-populated from the SDO Assignment Register.

Original instruction
Auto-populated from SDO Assignment Register

STATE REPORTING OFFICER

What the user can do

- View the assignment details
- View the original instruction
- Complete the short report
- Upload supporting evidence
- Save draft or submit report

Assigned by, assignment description, expected output and due date are system-generated and read-only.

STATE FORM

STATE REPORT

Form 2 — State Ad Hoc Assignment Report

The State reporting officer completes only the fields needed to explain the work done and provide evidence.

ASSIGNMENT DETAILS — AUTO-POPULATED FROM SDO REGISTER

State Assignment ID
ASG-2026-0048-KD

Assignment title *
From SDO Assignment Register

Originating department *
From SDO Assignment Register

Assignment description
Auto-populated from the SDO Assignment Register.

Expected output
Auto-populated from the SDO Assignment Register.

STATE REPORT

1. Completion status
Select: Completed / Partially completed / Ongoing ▾

2. Date completed
dd/mm/yyyy ▾ *(leave blank if still ongoing)*

3. Summary of work carried out
Briefly describe what the State did.

4. Output / outcome achieved
State what was delivered or achieved.

5. Challenges encountered (if any)
Briefly state any challenge that affected implementation/outcome.

6. Supporting evidence
Upload report, photographs, attendance sheet or other relevant evidence.

System captures automatically: State Assignment ID • submitting officer • date/time submitted • report version.

What happens when the State submits the report

Submission is automatically linked to the State Assignment ID and shared with the right users.

STATE SUBMITS

The report and its evidence are saved against the State Assignment ID. The system retains the State-entered completion date, submitting officer and submission date.

SDO IS NOTIFIED

SDO receives an immediate notification and can open the report, monitor submission and follow up where clarification is needed.

DEPARTMENT IS NOTIFIED

The originating department receives an immediate notification and can view/download the report and evidence for its assignment.

Status	Meaning	Who updates it
Submitted	State has sent the report	System
Returned for clarification	More information is required	SDO / originating department
Acknowledged	Department has reviewed/received the report	Originating department
Closed	Assignment reporting process is complete	SDO

Access rights — keep the register separate from the State report

Role-based access prevents State reporting officers from seeing or editing SDO administration fields.

User role	Can access	Cannot access / change
Authorised SDO staff	Create and edit the SDO register; select States; view all State reports; close assignments.	—
State reporting officer	View assigned State tasks; open instruction; submit or revise its State report.	Cannot view or edit the SDO register or other States' records.
Zonal Office	View assignments and reports for States in its Zone; monitor deadlines.	Cannot edit the SDO register or other Zones' records.
Originating department	View assignments it originated and all linked State reports; download evidence; comment / request clarification.	Cannot create assignments or edit State-submitted reports.

Key rule **SDO controls the assignment register; States only report against the assignments issued to them.**

DROPDOWNS, VALIDATION AND REPORT RULES

Proposed values and validation rules for consistent entry across all State Offices.

REFERENCE

SDO registration and distribution

- Originating department: select from NHIA department directory; include Other (Specify).
- Received through: Official memo / Email / Letter / Circular / Other (Specify).
- Priority: Normal / High / Urgent.
- Reporting requirement: Final / Periodic / Final and periodic.
- State: 36 States + FCT; Zone is system-populated.
- Responsible unit / officer: selected from State Office staff or unit list.
- Evidence: allow multiple files and secure document links.
- Other (Specify): reveal a mandatory text field when selected.

Mandatory system validations

Unique IDs

Every master assignment and State assignment ID must be unique and system-generated.

Due date

A State due date cannot be later than the overall assignment close date unless SDO overrides it.

Audit trail

Record all changes to assignment scope, recipient, deadlines, report versions and review decisions.

STATUS DEFINITIONS, PERMISSIONS AND CLOSURE

Separate the progress of the assignment from the review status of the report.

SYSTEM RULES

Assignment progress status

- Not Started
- In Progress
- Awaiting Support
- Completed
- Deferred
- Cancelled

Report review status

- Not Due
- Not Submitted
- Draft
- Submitted
- Under Review
- Returned for Clarification
- Accepted

Role-based permissions

State Office

View and report on assignments issued to its State; upload evidence; respond to clarification requests.

Zonal Office

View assignments and reports for States in its zone; monitor progress and follow up on overdue submissions.

SDO

Create and distribute assignments; national view; edit controlled assignment fields; monitor reports and close assignments.

Originating department

View only its own assignments and linked State reports; comment or request clarification.

Management / DG

National summary and drill-down oversight; no routine editing of State reports or assignment records.

Recommended closure rule

A report being submitted does not automatically close the assignment. SDO closes the State assignment after confirming that the required report is received and the originating department has had access to it. Departmental review can be tracked without blocking SDO from recording completion where the assignment terms do not require formal approval.

BUILD SPECIFICATION AND RECOMMENDED IMPLEMENTATION DECISIONS

The mock-up separates the source instruction, State-level delivery and report review into linked records.

BUILD NOTES

Core system components

- SDO assignment register with source-instruction attachment.
- State distribution table with one unique State Assignment ID per recipient.
- State report form with repeatable activity, output and evidence rows.
- Department access page for reports linked to its assignments.
- Notification service, reminders, audit history and report export.

Decisions recommended for development

- Permit progress updates and a final report where the assignment requires both.
- Allow multiple evidence files and versioned re-submissions after clarification.
- Keep original instruction and State-submitted report as separate linked documents.
- Use a controlled department directory and an “Other (Specify)” fallback.
- Make due-date changes and reassignment auditable and visible to affected users.

Scope note

This is an editable process and interface mock-up, not a live application. Dropdowns, user permissions, notifications, document storage and automatic IDs will be implemented in the eventual electronic system.
